

Brandon Academy Summer Reading and Math Practice

Second Grade

“You can find magic wherever you look. Sit back and relax, all you need is a book!”

– Dr. Seuss

This year the theme for the Brandon Academy Summer Reading is “Adventure.” When the students return to school in August, they will spend time sharing their summer reading projects.

We recommend reading daily with your child. Another great summer review resource is **Summer Bridge Activities Workbooks** available on Amazon for the transition from First Grade to Second Grade.

Kindergarten Summer Reading Assignments:

- Book #1
 - Read *Mercy Watson to the Rescue* by Katie DiCamillo
 - Complete the “One Pager” book report attached to this packet.

- Book #2
 - Read one book from the attached **SSYRA Junior Reading List**.
 - Fill out the attached page. Have your child draw a picture and write a sentence of his/her favorite part of the book.

Name: _____

END OF BOOK ONE-PAGER 1ST AND 2ND GRADE

After reading your assigned book, create a one-page book report using a blank piece of paper. Use the guidelines below to complete the report.

ON THE FRONT

- Title of book and author's name
- Draw and label the characters from the book
- A picture of when and where the story took place
- 2 words you would use to describe the book

Use color, be creative, be neat and fill the whole page!

ON THE BACK

- Draw a picture that shows your favorite part. Write to tell about your favorite part.
- Be sure to write your name!

Which will be your new favorite?

Name:

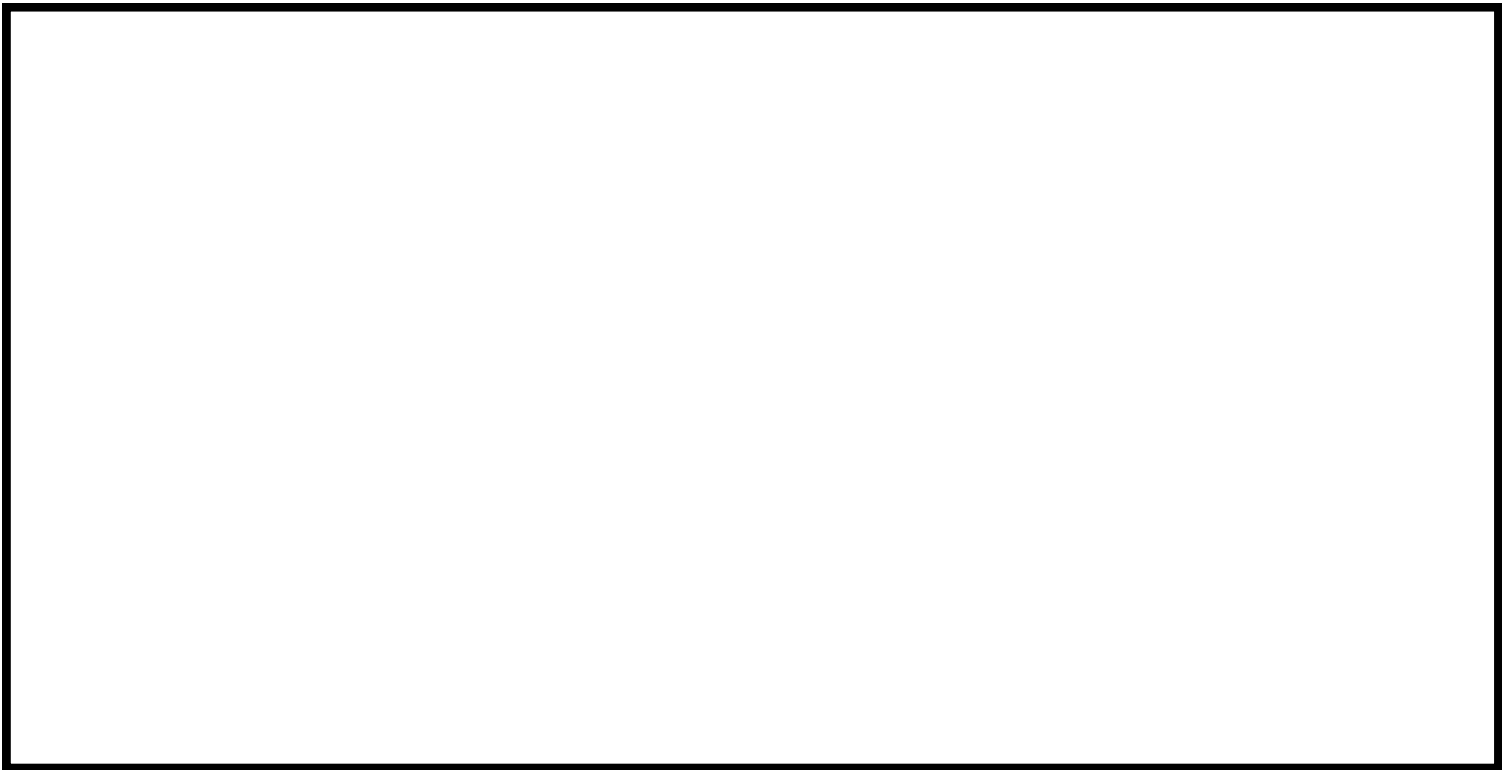

BATTLE OF THE BOOKS

15 BOOK CHALLENGE

After reading, please complete this page and turn it in to your homeroom teacher.

TITLE OF BOOK: _____

Draw a picture and write about your favorite part of the book.

Second Grade Summer Math:

Here is a list of activities to help students practice and reinforce their math skills. We recommend practicing math skills in a variety of ways throughout the summer! Feel free to add your own ideas to the list!

Shape Hunt- Go on a "shape hunt" around the home, asking your child to find different shapes and name their properties. You can also make this a scavenger hunt!

Counting Collections- Provide students with a collection of objects (buttons, coins, blocks) and ask them to count and group them. This helps reinforce counting skills and understanding of numbers.

Math Board Games- Use board games like "Chutes and Ladders," "Monopoly," or "Candy Land" that incorporate counting, addition, and subtraction into the gameplay.

Number Line Jump- Draw a number line on the ground and call out math problems (for example, "What's $5 + 3$?"). Students "jump" to the correct number on the line as quickly as they can.

Domino Math- Use dominoes to practice addition and subtraction. Students can add the dots on the domino or subtract one side from the other.

Puzzles- Puzzles help students practice problem solving, pattern and shape recognition and spatial awareness.

Skip Counting Hopscotch- Set up a hopscotch grid with skip counting patterns (count by twos, fives, or tens). Students can hop and count aloud as they go.
